

What is RefWorks?

RefWorks is web-based bibliographic software package that enables you to:

- Organize your research
- Include citations while you write your paper
- Build a bibliography in a variety of formats
- Import references from many data sources
- Create bibliographies in different document formats (Word, RTF, HTML, etc.)

Being web-based means no software to download and update, and you can access your personal account from any computer connected to the internet.

RefWorks simplifies the process of documenting sources in your paper with minimal effort while still preserving all of the detailed information about that source for future use.
