BACHELOR OF SCIENCE IN

COMMUNICATION DISORDERS

SCHOOL OF HEALTH AND NATURAL SCIENCES
GRADUATE OPPORTUNITIES
Students who have a B.S. in Communication Disorders have many options for pursuing graduate studies and can branch out into related areas such as:

- Speech-Language Pathology
- Audiology
- Speech and Hearing Science
- Linguistics
- Teaching Students with Speech and Language Disabilities (TSSLD)
- Teaching the Deaf and Hearing Impaired

LEARNING BY DOING
- Learn about diagnostic testing and treatment techniques for a variety of pediatric and adult communication disorders through observations and classwork
- Opportunities for mentoring and clinical supervision by expert faculty members who are licensed by New York State and certified by ASHA

SPEECH AND HEARING CENTER
As a Communication Disorders student, you’ll have the opportunity to see speech-language pathology and audiology evaluations and treatment, by observing real clients being treated at our on-site Speech and Hearing Center. The Speech and Hearing Center offers evaluation and treatment of communication disorders for clients of all ages, and has served the community for more than 30 years.
DO YOU WANT TO HELP PEOPLE COMMUNICATE?

A major in Communication Disorders allows you to study speech-language pathology and other areas related to human communication. You will learn how to evaluate, treat and prevent communication disorders in order to enable people to effectively communicate with others in their personal, academic, and professional lives.
