If the participants of the proposed research will be in contact with any mechanical, electronic, electrical or other equipment that might subject them to the possibility of accidental harm or injury, please provide the information requested.

1. Description and location of the equipment to be used (include manufacturer’s name and serial numbers, if appropriate).

2. Identify and describe how participant will interact with the equipment.

3. Names of all individuals trained and authorized to use the equipment for this project (please specify training received in use of equipment).

4. Certification of safety inspection:

The equipment described above has been examined and found to be in good working order. In respect to the stated purposes and the procedures as outlined, it is safe for use in research involving human participants.
